

Colour is our nature

8A DALI Full-Colour Dimmable LED Driver

LINEARdrive

LINEARdrive gives you all the control you need for your low-voltage LED application. This constant voltage LED driver is DALI compatible and enables you to create the perfect shade of white or show sequence without an external controller. Symbiosis ensures the LED driver works seamlessly together with LED modules, controls and intelligent luminaire elements.

Product offering

LINEARdrive 210/D

210D1
EARdrive DC, 8A, 12-24VDC, DALI, 1 control channel, constant voltage, 2x D outputs, plastic long

Programming tools

Programming interface	TOOLbox pro (TLU20504)
Programming cable set	TOOLbox pro to LED driver, programming cable, 5pcs (TLC03051)
Programming software	FluxTool

Warranty

Warranty period

General Terms and Conditions

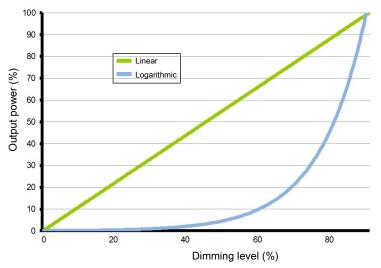

Order number configurator

$\frac{\text{OOOOOOO}}{P^{/N}}$	
P/N	LED driver part number.
Input characteristics	
Nominal input voltage DC	12 - 28V
Maximum input current	8A, irrespective of PSU voltage
Output characteristics	
LED output load	8A maximum, irrespective of whether using one or both LED outputs
Maximum LED output power	200W
Number of LED outputs	2
LED output voltage	12 - 28V
Auxiliary output voltage	equal to input voltage
Auxiliary output current	180mA @ 12V, 90mA @ 24V
Maximum auxiliary output power	2W
Circuit protection	To prevent excessive output current from damaging the LED driver, it is highly recommended to use circuit protection appropriate for your application's nominal and inrush current requirements in combination with an OVP, OVC short circuit protected AC/DC adapter.

Control characteristics

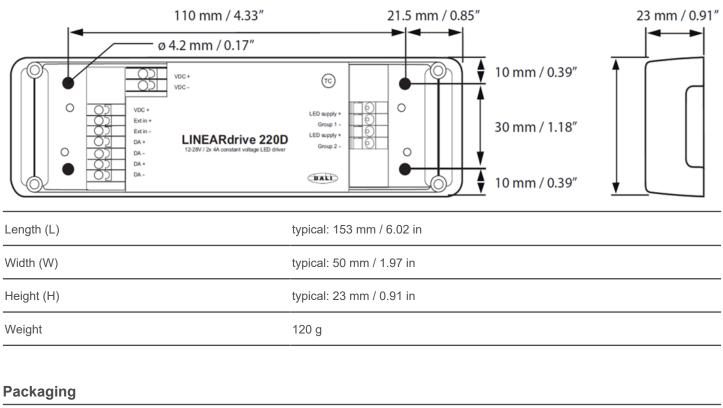

Control channels	1	
Control protocol	DALI	
Dimming range	100% - 0.1%	
Dimming curve options	Logarithmic (default) Linear	
Dimming method	HydraDrive	
Dimming curves	400 -	

Environmental conditions

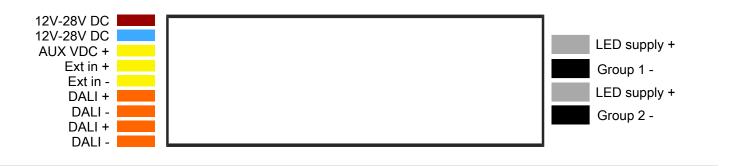

Operating ambient temperature (Ta) range	-20 °C to +50 °C
Maximum operating case temperature (Tc max)	65 °C

LED driver mechanical details

Products per box 12 pcs

Connector layout

Wiring specifications

Wire core cross section	0.2 - 1.5 mm² AWG 24 – 16
Wire strip length	9.0 mm / 0.35 inch

Certifications

Safety	
19	Risk of electrical shock. May result in serious injury or death. Disconnect power before servicing or installing.
<u></u>	The LED driver may only be connected and installed by a qualified electrician. All applicable regulations, legislation, and building codes must be observed. Incorrect installation of the LED driver can cause irreparable damage to the LED driver and the connected LEDs.
	Pay attention when connecting the LEDs: polarity reversal results in no light output and often damages the LEDs.
	LED drivers are designed and intended to operate LED loads only. Powering non-LED loads may push the LED driver outside its specified design limits and is, therefore, not covered by any warranty.
j	eldoLED products are designed to meet the performance specifications as outlined at certain operating conditions in the data sheet. It is the responsibility of the fixture manufacturer to test and validate the design and operation of the system under expected and potential use cases, including faults.
(j)	Please observe voltage drop over long cable lengths. Longer cable lengths increase EMI susceptibility.
í	Product renderings and dimensional drawings are generic for the housing type. Product label, connector type and quantity may vary.
